

AI CO-FOUNDER HACKATHON · SELL IT TRACK

ChameleonCo

One AI co-founder that becomes the expert your business is missing, and finds your first customer.

Eric Chong, CEO · Alexandra, CTO · arautoai.com

**Everybody knows you can ask
AI anything. However, you still
have to ask.**

ChatGPT waits for you. A co-founder doesn't.

THE PROBLEM

85 of 112 founders we read were stuck on the first customer, not the product.

They built the thing. Nobody will go first. That's the gap we close.

Source: 112 public founder posts we read and coded, September 2026.

Two AI co-founders

01CO · THE COO

Owens a goal and runs the company overnight.

Sets the pace, decides what to do next, and reports in at 9 AM.

CHAMELEON · THE EXPERTS

Becomes the expert each step needs.

Finds your real buyer, writes to them in their words, and re-plans from every reply.

SAME NIGHT. REAL RUNS.

A different expert for every business.

● The copywriter

"The offer is fine. The homepage talks to everyone."

HOW IT'S BUILT

The stack, and what each sponsor did.

AdaL

Built the first two phases: the page, the engine, the opt-in, and the goals. Pull requests #1 and #2.

Tenki

Reviewed every pull request: 35 review comments across 10 PRs. We fixed what it found.

Nebius

Second engine: DeepSeek V4 Pro on Nebius answers an expert step in under 2 seconds. Claude does the web research.

Claude

The brain behind every expert: researcher, offer strategist, copywriter, closer.

Channels

Telegram bot, a text line, the web app. Sends from your own email, only on your tap.
